

Aung Paing

E-commerce Merchandising Assistant

I finished high school in 2019 and studied IT at "Metro" college for about a year.. Unfortunately, the college closed because of the pandemic and political issues. I also enrolled in a university and majored in English. However, I do not have plans to attend the university. I have finished learning frontend technologies and also Jakarta EE (Spring Boot) for Backend. I am currently learning PHP (Laravel) and also have plans to learn mobile development.
